A New Level of Productivity

The 600A Series articulating boom lifts from JLG are designed to optimize your productivity and reduce your owning and operating costs.

More Choices

The 600A Series features the industry's highest capacity, and the Model 600AJ comes standard with an articulating jib for extra versatility. Combine the narrow chassis with optional 4-wheel steer for the most maneuverable 60 ft. machine available. Optional 4-wheel drive and standard oscillating axle deliver legendary drive performance.

High Capacity

A platform capacity of up to 1,000 lbs. (450 kg) on the Model 600A increases your productivity by allowing more workers and materials in the platform. This is especially critical for applications requiring extra capacity such as steel erection, mechanical contracting and glazing.

The Industry's Best Reach Envelope

The 600A Series delivers 26 ft. 7 in. (8.1 m) of up and over height and up to 39 ft. 9 in. (12.12 m) of horizontal reach.

Service and Reliability

The 600A Series is designed to reduce preventive maintenance and optimize machine uptime. Better fuel efficiency, a swing-out engine tray and JLG's Control ADE™ System are just some of the features that keep your owning and operating costs low and your machine working.

Options to Create Your Workstation in the Sky™ Product

Transform your Model 600A or 600AJ into a true Workstation in the Sky™ product with exclusive options and accessories from JLG. Whether designed for a specific application like the SkyWelder™ Package or to meet a variety of needs like the SkyPower™ Package, JLG has many options available to increase your productivity and enhance your work environment.

SkyPOWER

SkyPower™ Package

JLG delivers more power where you need it with the SkyPower™ Package. Machines outfitted with the SkyPower Package include a 7500W self-contained generator, plus a power cable and a 1/2 inch air line routed through the boom's power track to the platform. As an added benefit, the SkyPower Package is designed to work with various add-on accessories, including the SkyWelder™ Package.

SkyWelder™ Package

A Miller® welder is tucked into the SkyPower™ boom platform. Conserves space and provides stick and TIG capability. It also eliminates potentially dangerous leads hanging over the rails and the cost of a stand-alone welder and power supply. Wire feed capability and other convenient features are available.

Greater Accessibility

The 600A Series is available with the industry's narrowest chassis and optional non-marking tires.

The 7 ft. wide 600A Narrow and 600AJ Narrow allow you to go where wider competitive machines can't.

Outstanding Drive Performance

The standard oscillating axle delivers a smoother ride and better traction.

Optional 4-wheel steer provides unmatched maneuverability in confined areas.

SkyGlazier™ Package

The first and only factory-approved glass and panel tray. Utilizes industry leading JLG capacity to get materials to the work site. Improves productivity and reduces operator fatigue, while helping to protect panels from damage.

SkyCutter™ Package

Cut faster and cleaner with an on-board Miller® plasma cutter. Eliminate the potential dangers of Oxygen/Acetylene tanks and hoses draped over the railings. Add a SkyCutter™ Package to any unit equipped with the SkyPower™ Package.

Pipe Rack Accessory

JLG's exclusive Pipe Rack Accessory is designed to secure pipes close to where they are needed. The pipe rack is mounted to the top platform rail and can hold up to 180 lbs. (80 kg) of pipe.

Keep checking www.jlg.com for additional Workstation in the Sky™ accessories.
